DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claim(s) 10-13, drawn to a method of continuous metering of bulk material, class 406, subclass 197.

Group 2, claim(s) 14-18, drawn to an apparatus for continuous metering of bulk material.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I claims are directed to a method, classed in class 406, subclass 197. Group II claims are directed to an apparatus, classed in class 406, subclass 129. The apparatus of Group II can be used to perform other materially different processes and the method of Group I can be performed by hand.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
